

SCOPE

The **IX International Congress and 23^a Technical Meeting** is the biennial event of AATH that brings together outstanding experts in Concrete Technology in Argentina, along with international personalities prominent in the sector.

VENUE

La Plata is the capital of the Province of Buenos Aires, Argentina. Previously, AATH has celebrated its biennial meeting in this city in 1982 and 1995. Similar events in the area took place in La Plata in 2005 (fib Symposium) and 2015 (Sustain Concrete). Because of this background and its academic, scientific and professional spirit, the city constitutes a **pole of knowledge** in the area of Concrete Technology.

The sessions of the Congress will take place in the "Sergio Karakachoff" Building from **UNLP**, located in the centre of the city (48 entre 7 y 8). The associated activities will be developed in the **UTN-FRLP** building (60 y 124) and the **LEMIT** building (52 entre 121 y 122). The complementation between the three Venues offers ample possibilities for the celebration of the Event.

Tourist attractions in La Plata include the Natural History Museum, the Planetarium, the Children's Republic Park, the Argentine Theatre and the City Cathedral. The Event will include various social activities for attendees and companions.
